RP268 AERO FLOW SUB-ZERO CA REGULATOR (copy)

DESCRIPTION

• The Sub-Zero Air Compressor draws in hot ambient air and passes it through a specialized water-oil separator, where the hot and cold air streams are isolated. Cold air will then be continuously delivered to your connected headtop or cooling vest, ensuring a lasting cooling relief in high temperature work environments. Say goodbye to the hassle of traditional ice cooling methods. With a simple switch, enjoy instant cooling at your fingertips.

Specifications/Technical Data

Size	173.5 x 112 x55mm
Weight	330g
Input Pressure Range	35 -45 PSI
Compressed Air Flow	260 - 400 L/min
Cooled Air Flow	190 -290 L/min
Maximum Cooling Temp	-19°C

COLOUR AVAILABILITY

BLACK
